- + Website homepage, product management, payment

Website SupMark

Mar,2021-Jun,2021

Online Grading System is an online grading and analytics platform that helps educators to more effectively evaluate student work. The platform allows for easy distribution and collection of student work and provides the delivery of rich feedback to students. Students can feedback and exchange with teachers through the comment tool about the teacher's evaluation, helping to improve fairness in grading, helping students understand the lesson better
